

Kubasik Portable Tote Bin Lifter

Kubasik Eurobin Tipper provides a safe, hygienic and efficient solution for emptying standard 200 and 300-litre tote bins into food-processing machinery.

Its mobile design allows the tipper to be positioned wherever required, helping manufacturers reduce manual handling, improve operator safety and maintain a consistent production flow.

With a maximum lifting capacity of 350 kg and a standard tipping height of 1,150 mm, the machine is ideal for loading mixers, mincers, vacuum tumblers, cooking vessels and other processing equipment.

The controlled 0.25-minute tipping cycle transfers products smoothly and efficiently while helping to reduce spillages and product waste.

Manufactured from stainless steel with a strong welded construction and hygienic sandblasted finish, the Kubasik Eurobin Tipper is built for demanding food-production environments.

Simple 24 V safety controls, a 0.75 kW motor and robust wheeled frame provide reliable operation with excellent mobility.

Suitable for meat, poultry, fish, vegetables, ready-meal ingredients, pet food and many other products.

Contact Total Food Machines today to discuss the Kubasik Eurobin Tipper or your complete product-handling requirements.
